Whether you're managing a mine, logistics hub, or commodity site, Atarah simplifies complex processes, enhances safety and ensures regulatory compliance, keeping your operations smooth and secure.

Securing Goods in Transit: Minimising Risk, Maximising Safety, Maximising Efficiency

Movement of Goods:

- Commodities or Consumer Goods

Value Proposition:

- Reduce the opportunity for theft (RISK)
- Enhance safety for personnel and assets
- Improved operational Efficiency

Atarah Solutions strategically focuses on the following business sectors:

Electronic Proof of Delivery and Transport Management Solutions

Workflow based solutions beyond the transport and logistics industry may be considered provide the configuration may be carried out by the skills within Atarah Solutions.

In-Premise

Access Control and Visitor Management Solutions.

Mining Transport Solution

Coal, Diamond and the Petrochemical Industries.

Custom Solutions

- Asset or Gear Control
- Refuelling
- RFID based solutions
- The development team can assist with all customer requirements .

Streamline Your Operations

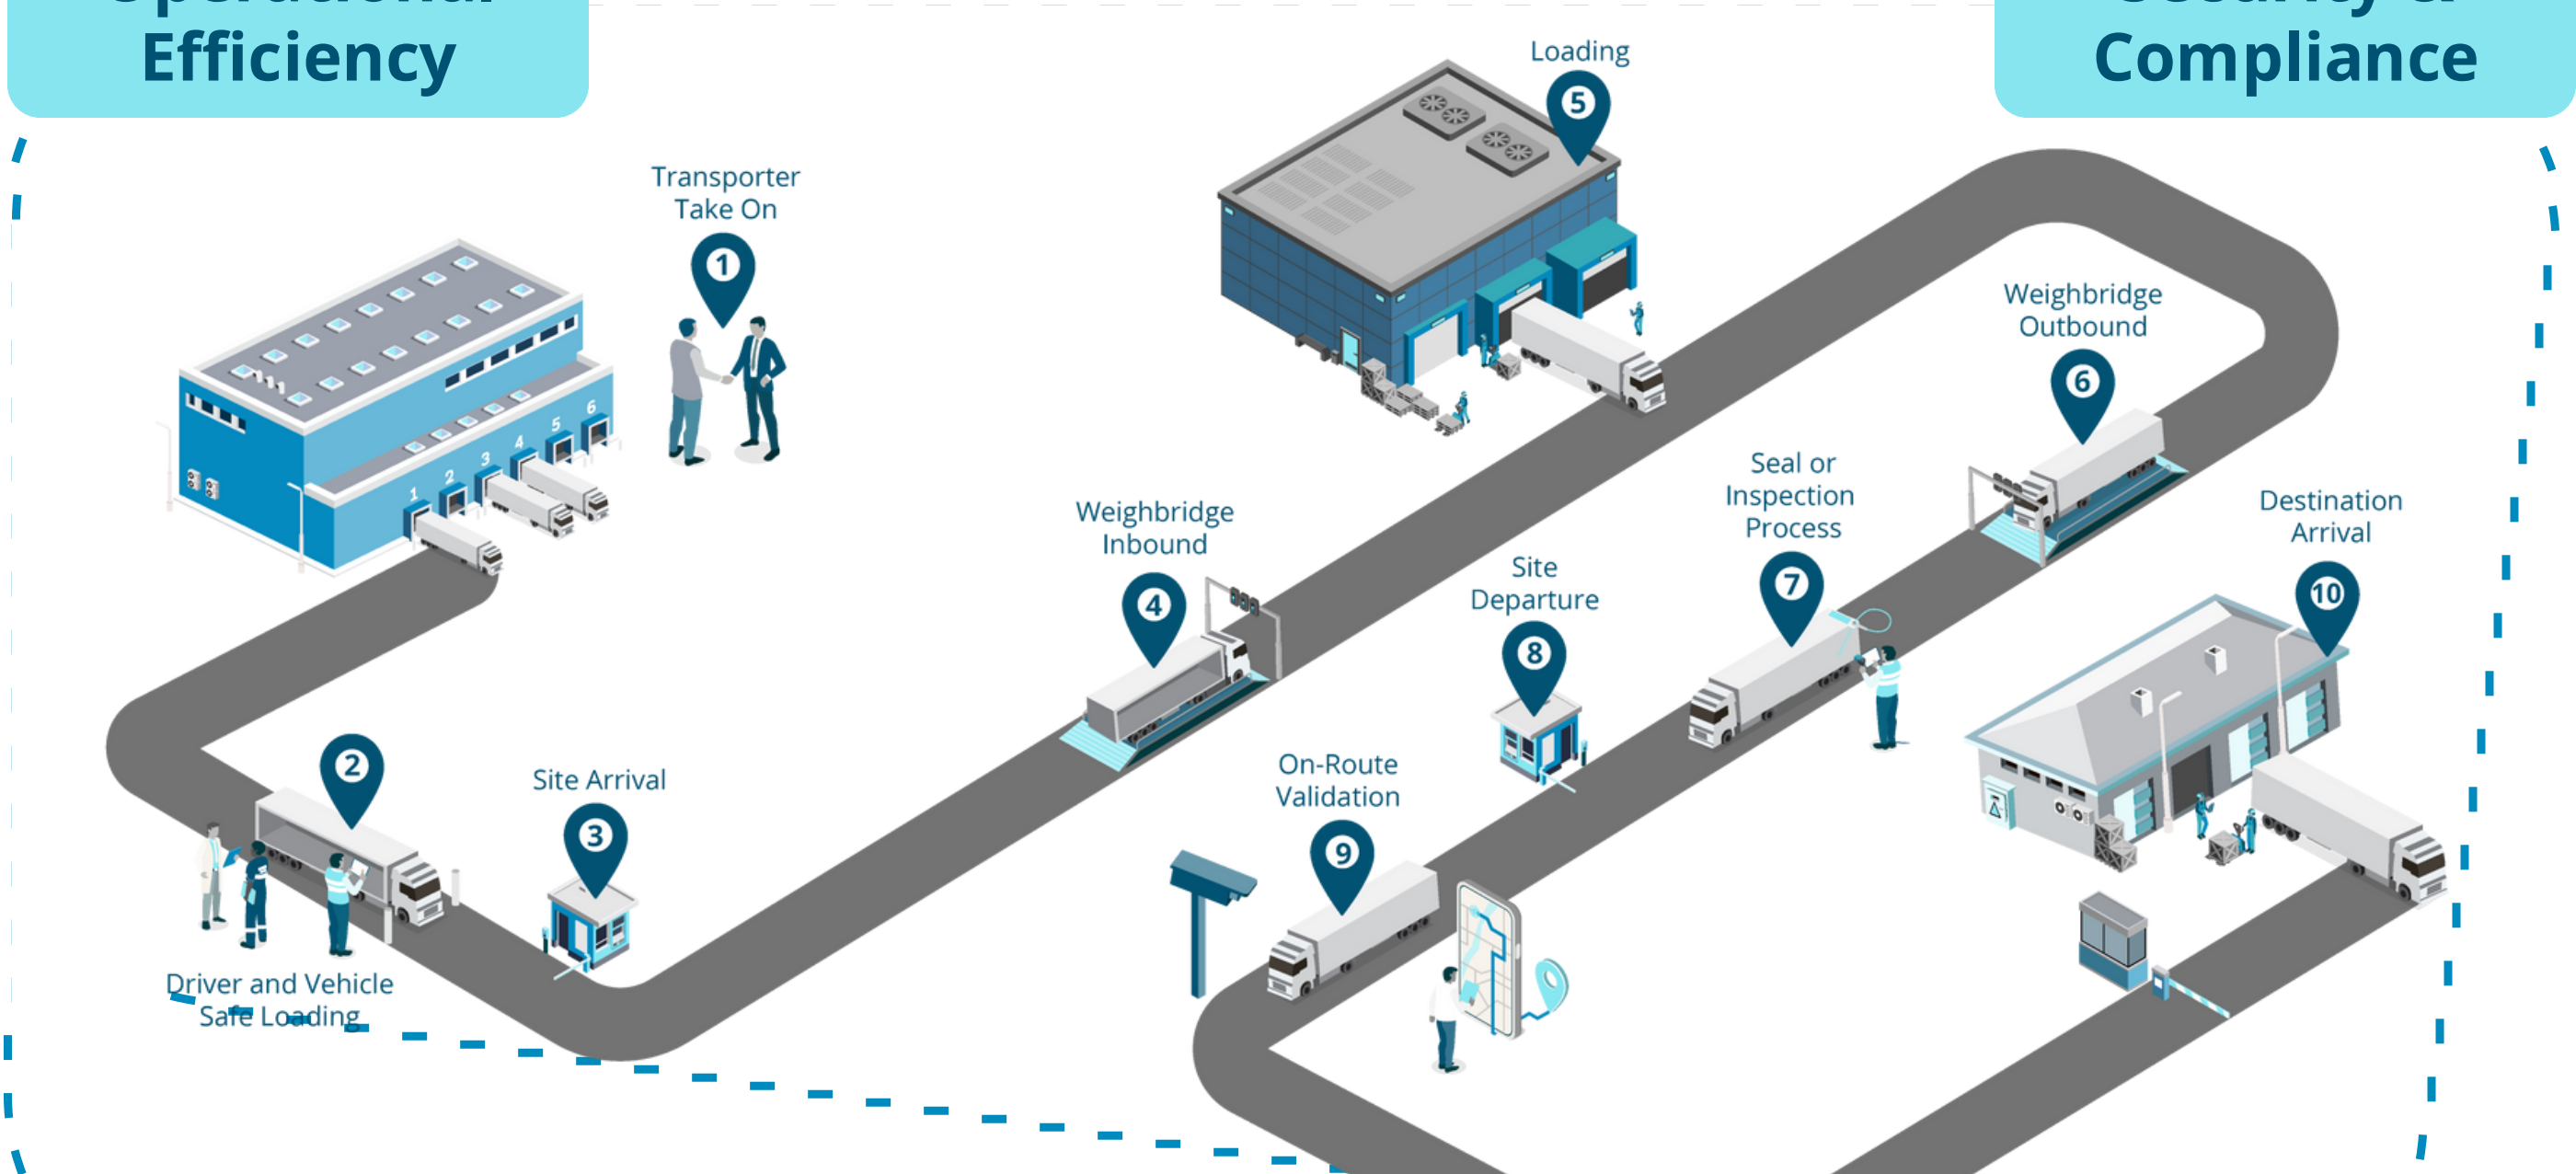

Operational Efficiency

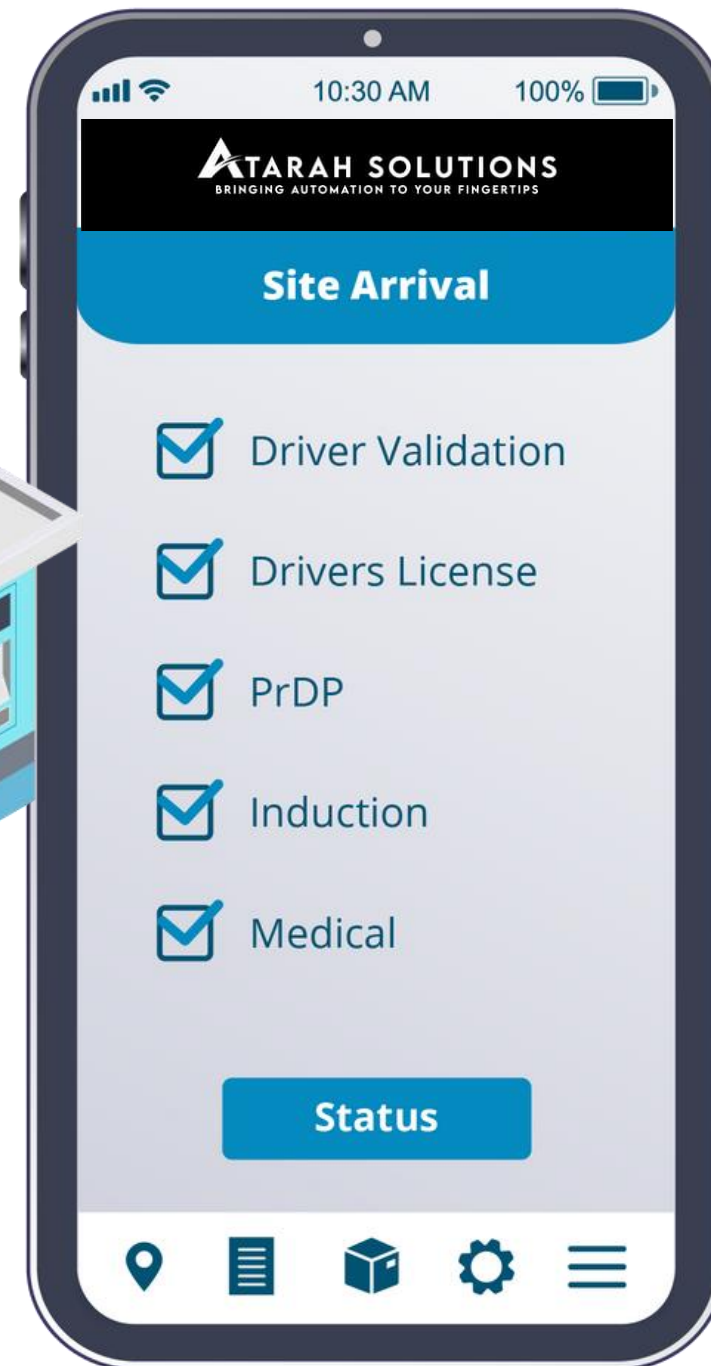

Security & Compliance

Health & Safety

Visibility & Control

Step 3: Site Arrival

a. Driver Validation:

- i. Drivers License
- ii. PrDP
- iii. Induction
- iv. Medical
- v. Status (Blocked or Undesirable)

a. Vehicle Validation:

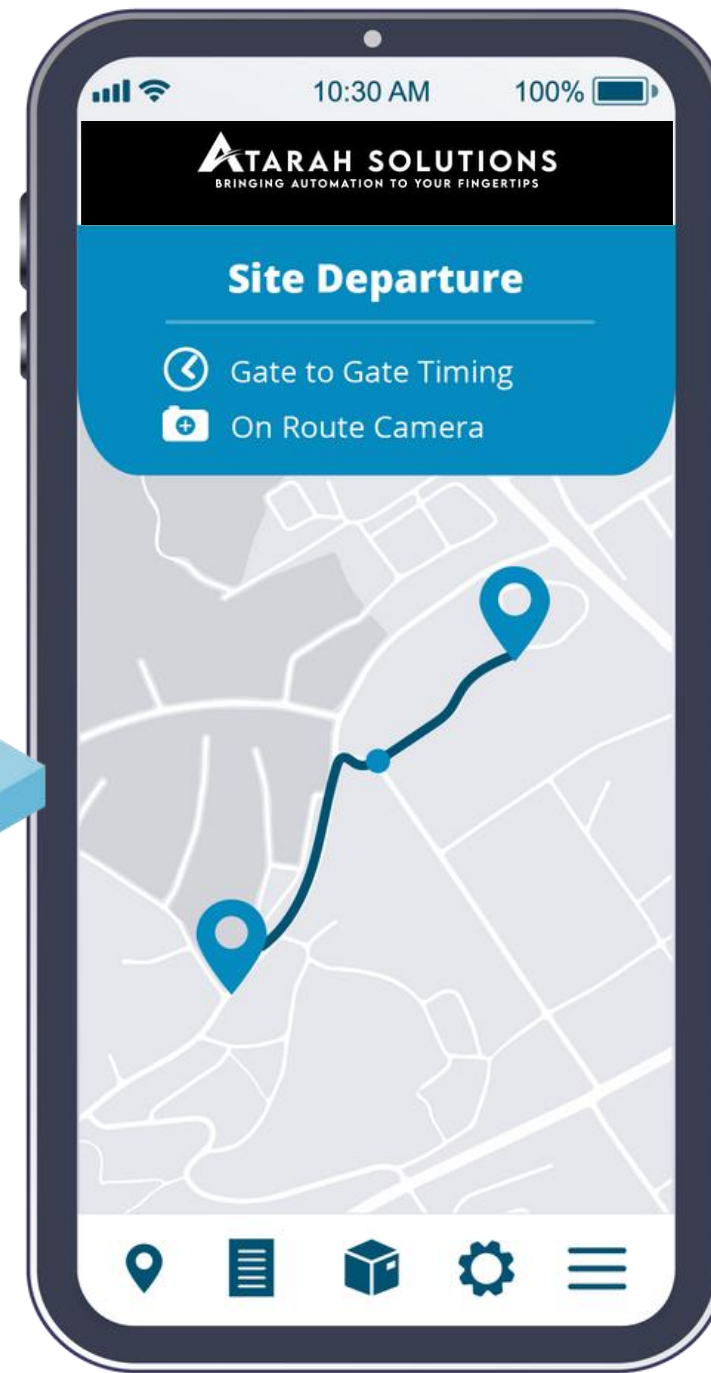

- i. Vehicle License
- ii. Inspection
- iii. Status (Blocked or Undesirable)

a.PPE

b.Breathalyser

c.Firearm

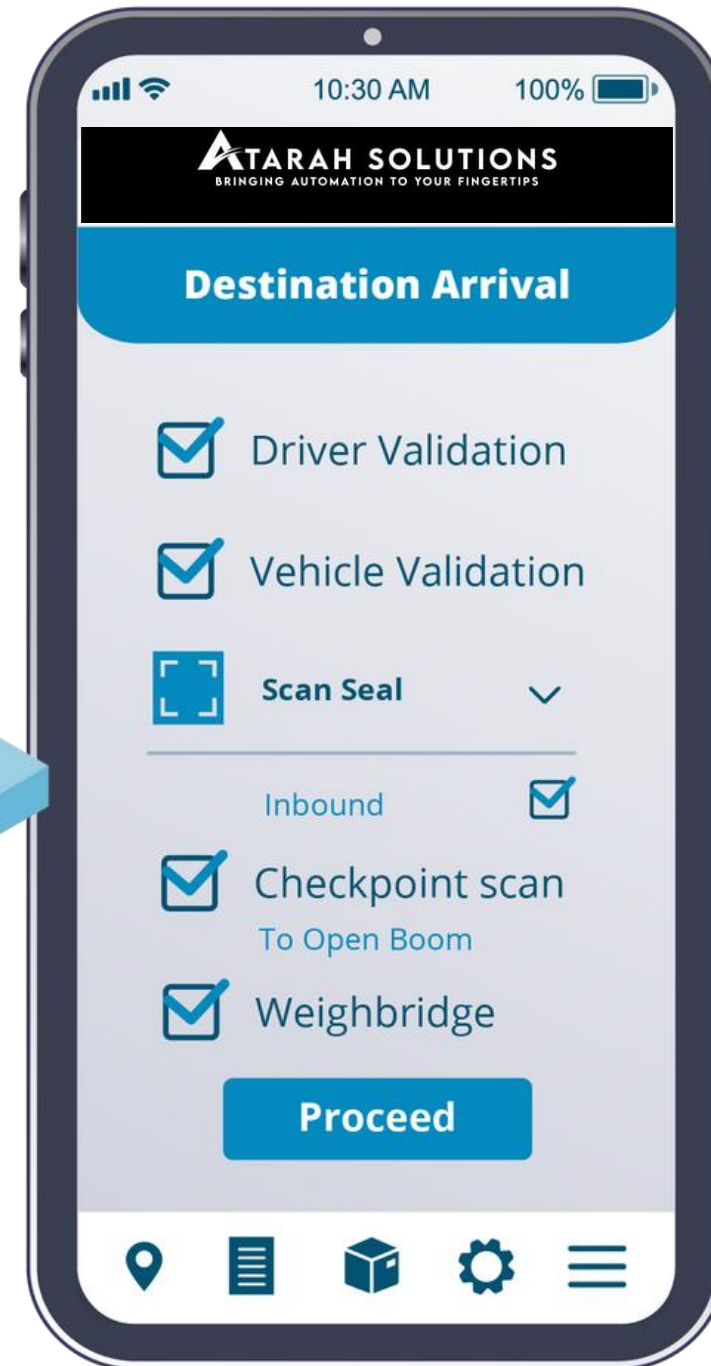

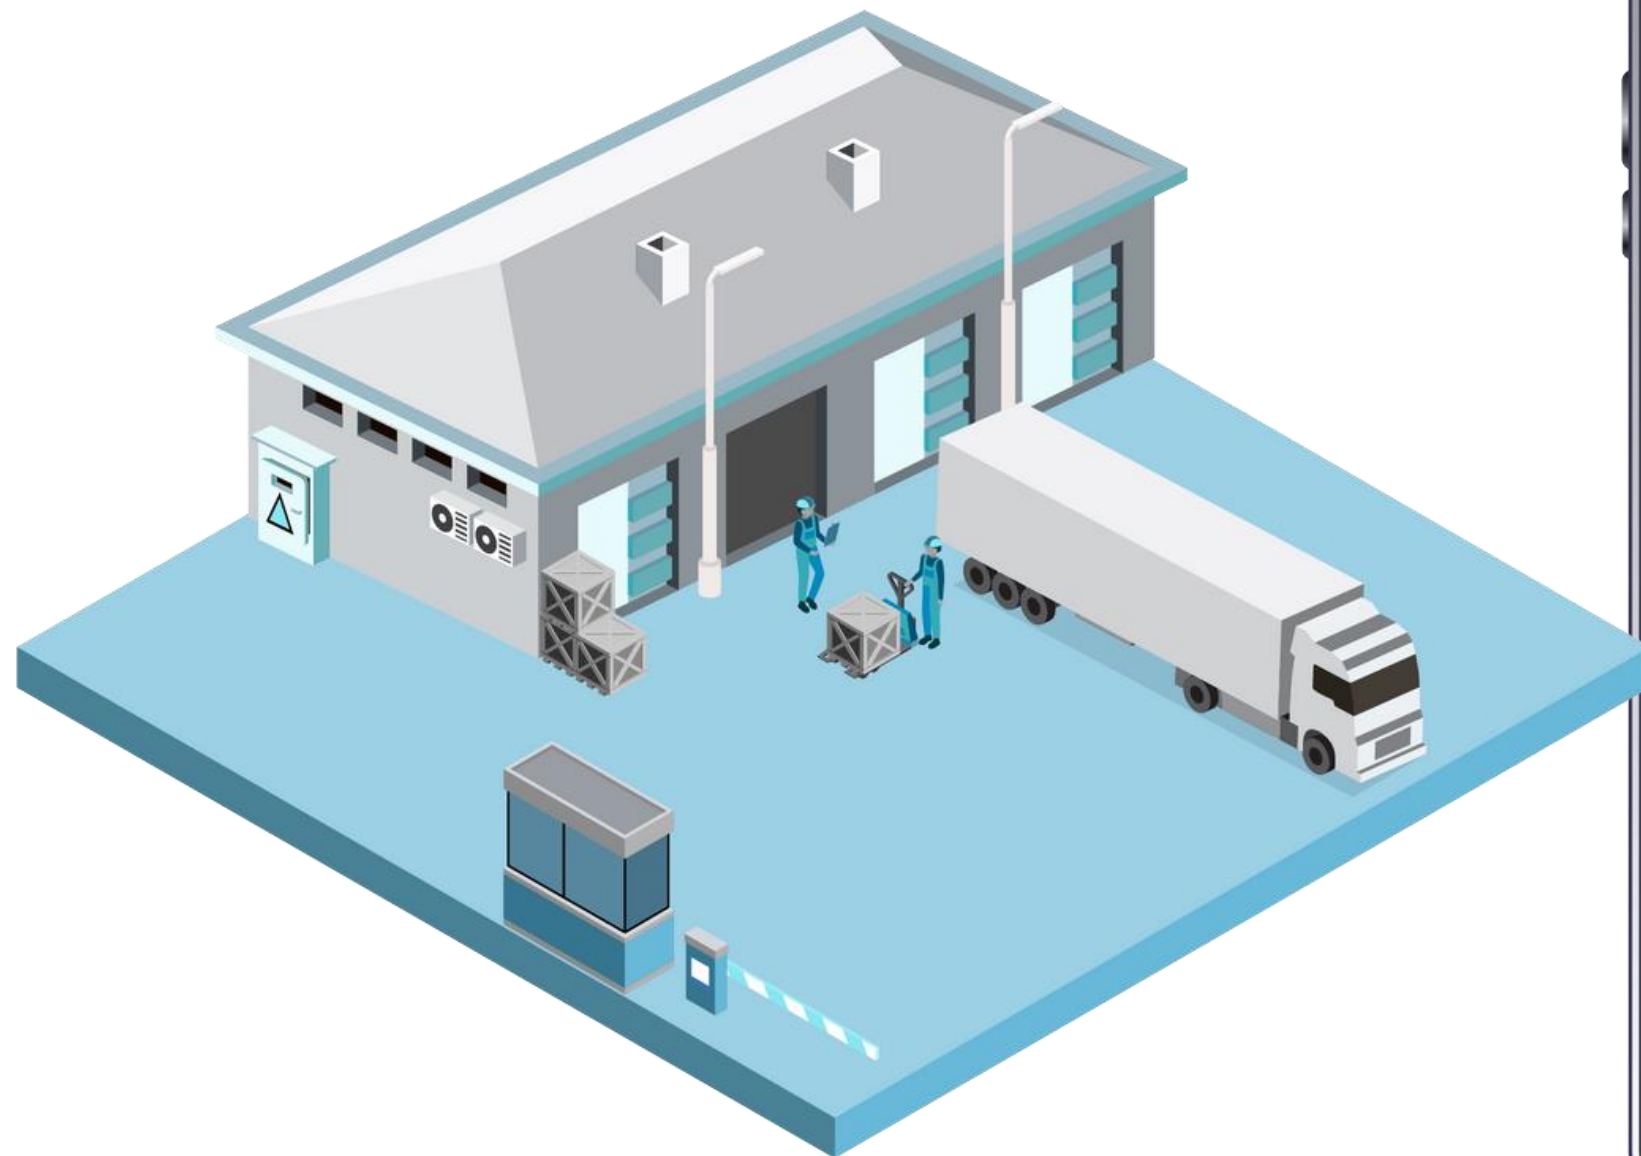

Step 9: On-Route Validations

A. Gate to Gate Timing

B. On Route Camera Integration

Step 10: Destination Arrival

A. Driver Validation

B. Vehicle Validation

C. Inbound Seal Scan and Validation

D. Checkpoint scan to open Boom or gate

E. Weighbridge

Contractor and Driver Management

- Medical and Induction Expiry date capture on the back-end and validation on the mobile devices
- Drivers License and PrDP Expiry validation on the mobile devices

Visitor Management

- Atarah provides a range of solutions to manage and augment security services which caters for individuals entering the facility whose access is not regulated by an existing Access Control or Time and Attendance solution. The application integrates access control via mobile terminals and offers ad-hoc or scheduled visitors through an online visitor management system where all the pertinent details can be added ahead of time.
- The management of visitors is offered through visitor access procedures on the mobile terminals with full identification through driver's license, passport or foreign document capture and vehicle license disk scanning.

Vehicle and Drive Scheduling

Technology Integration:

- Utilises cutting-edge scanning technology for both vehicles and staff.

Comprehensive Recording:

- Meticulously logs all entry and exit transactions.

Accessible Dashboard:

- Transactions conveniently available via the Security Checks grid link.

Key Details Captured:

- Includes Person Identifier (ID), Vehicle Registration, and timestamps.

Visitor Categorisation:

- Categorises individuals into visitor types (employees, contractors, suppliers).

Purpose Tagging:

- Associates each entry/exit with a specific purpose (Collection, Delivery, Transfer).

Security Assurance:

- Ensures secure and monitored site access.

Real-time Visibility:

- Contributes to real-time visibility of site activities.

Historical Tracking:

- Facilitates historical tracking for effective security management.
